Introduction

Mobile Gaming

Industry projected to reach \$389.70 billion by 2028.

Accessible, engaging, and social.

Crypto

Shares virtual economies with gaming. Offers digital assets and real-money earning potential.

Rabbit Leap

Merges mobile gaming with cryptocurrency. Creates a vibrant ecosystem for players.

Rabbit Leap Overview

1 Early Adoption and Customization

Invest with early adoption and customized NFTs.

2 Daily Tasks and Missions

Engage in activities to earn additional rewards.

3 Community Interaction

Join a vibrant community, participate in social activities, and refer friends.

GameFi Experience = Key Onboarding Driver

Games can serve as an excellent "soft onboarding" tool to introduce newcomers to the world of cryptocurrencies, blockchain, and digital asset technology. By immersing players in vibrant virtual economies with in-game currencies, trading platforms, and the ability to earn digital assets, games help users understand core crypto concepts like decentralization, data protection, and asset exchange.

This hands-on experience with familiar game mechanics makes the transition to cryptocurrency more natural and engaging. Players who have already accumulated in-game value are more likely to willingly set up a crypto wallet and continue exploring the crypto ecosystem.

Gameplay and Growth

1

Missions

Daily tasks and special missions provide additional challenges and rewards. Players can complete regular tasks such as subscribing to Twitter, Telegram, sharing links, as well as gamified missions such as TapToWin.

2

Community

Players can interact, trade, and compete with others in the Rabbit Leap community.

User Acquisition and Community

1

Marketing

Targeted ads and influencer partnerships to attract new players.

2

Referral Program

Incentives for players to invite friends and grow the community.

3

Social Features

In-game social interactions and community events to boost engagement.

4

Retention

Regular updates and rewards to keep players engaged long-term.

Key Metrics

Daily Active Users (DAU)

Monthly Active Users (MAU)

Average Revenue Per User (ARPU)

User Retention Rate

In-game Transaction Volume

Community Engagement Rate

Token Circulation

Network Growth Rate

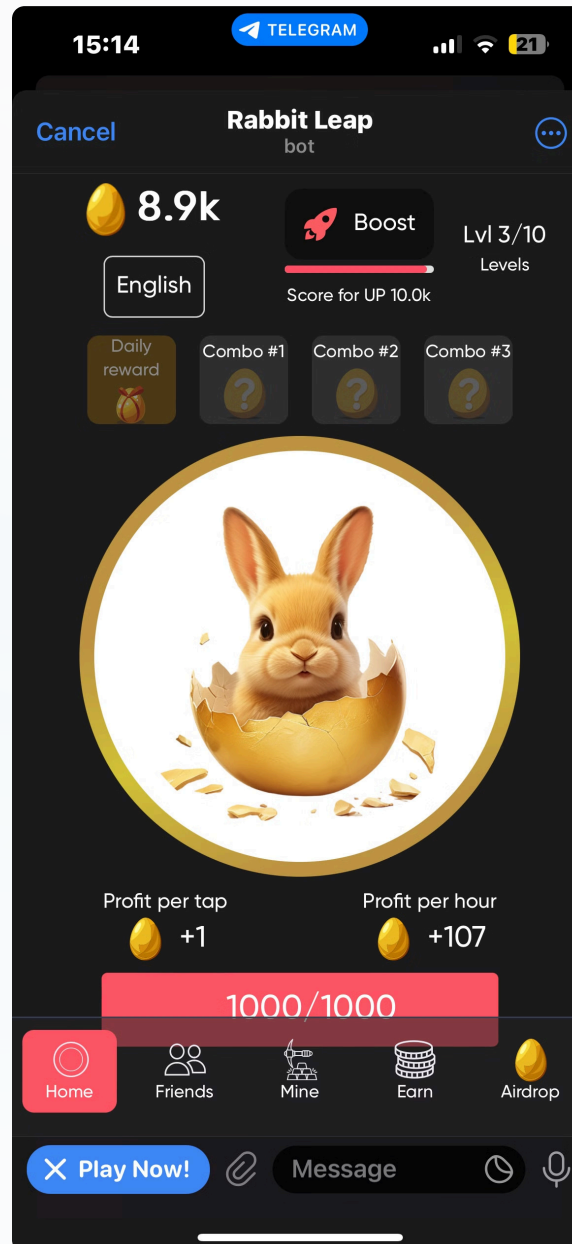

Product Comparison

Token	Shiba Inu (SHIB)	Pepe Coin (PEPE)	Notcoin (NOT)	Hamster Kombat (HMSTR)	RabbitLeap (RBTC)
Current Market Cap (Billion)	10.2	4.76	1.39	2.54	
Current Price (USD)	0.0000171	0.00001232	0.01354	0.0039	
All-Time High (USD)	0.000000008331	0.00001717	0.02896	0.0085	
All-Time Low (USD)	0.0000000001066	0.000000055142	0.004605	0.0024	
Max Supply (Trillion)	589	420.7	0.1	0.06	1
Notable Metric	Initial supply of 1 quadrillion, 50% burned by Vitalik Buterin	Surged by 7,000% within 17 days of launch	Over 40 million users	Monthly active users peak at 300 million in August 2024	Expect a listing price of \$0.001 in the second quarter of 2025

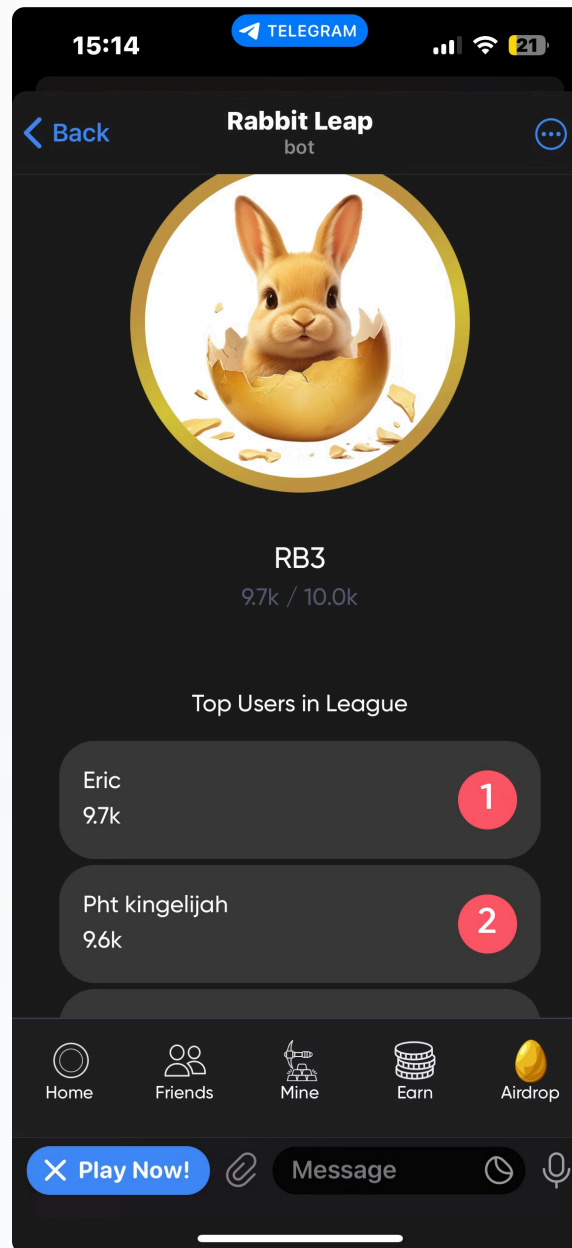

Main Functions

Launch Telegram Game with https://t.me/RabbitLeap_bot?start=1304753355 and click "Play Now !" You can Toggle language at the top and click the Rabbit Icon in the middle of page to earn 1 RBTC reward point per tap.

Main Functions

At the Fourth Page, you see a list of tasks to complete. For Each Task, completion results in a pre-specified amount of reward points.

Main Functions

At the Fifth Page, You see a box for your Ethereum wallet address. Enter your valid wallet address to qualify for periodic airdrops.

Supercharging User Growth through Crypto Incentives and Viral Platforms

Crypto Incentives

Leverage the appeal of earning cryptocurrency rewards to incentivize new users to sign up and engage with your game. This can create a powerful growth engine.

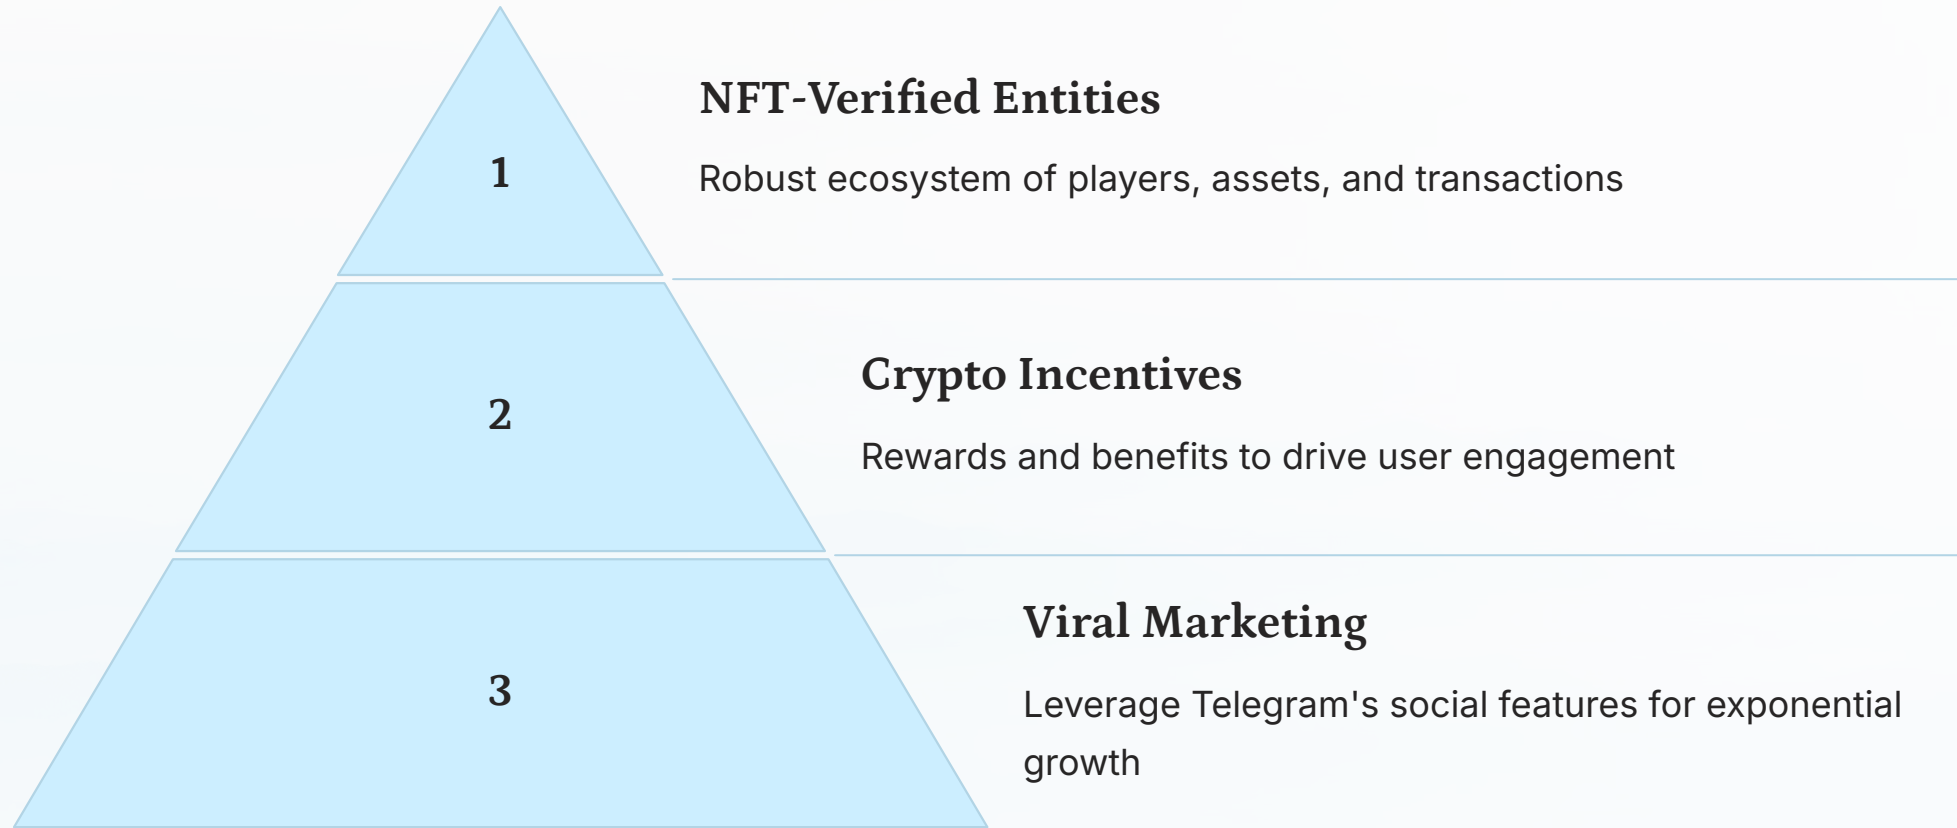

Telegram Integration

Utilize Telegram's extensive user base and viral community features to spread awareness and drive signups. Leverage Telegram bots and groups to foster a vibrant in-game community.

Referral Programs

Implement a robust referral program that rewards existing players for inviting their friends. This taps into personal networks to accelerate user acquisition.

Vibrant NFT-Powered Ecosystem

At the heart of the Rabbit Leap experience is a vibrant ecosystem powered by NFTs, which verify the authenticity and ownership of in-game assets, players, and transactions. This decentralized foundation is supercharged by strategic crypto incentives that motivate users to actively participate, trade, and grow the community. To sustain this growth, Rabbit Leap leverages Telegram's viral features, enabling players to invite friends, engage in social activities, and spread awareness of the game across global networks.
